Books & Games

Gym & Swimming

Movies & TV Series

Meditation & Psychology

Travelling & Stargazing

WISDOM THAT STICKS WITH ME

Greatness comes from humble beginnings; it comes from grunt work. It means you're the least important person in the room—until you change that with results.

MIHIR DAVE

React js | Javascript | JSX | jQuery | HTML | CSS |
WordPress | WooCommerce | PHP | MySQL |

ABOUT ME

I'm a Web Wizard with 5 years of conjuring up complex eCommerce solutions and transforming them into smooth, user-friendly experiences. Think of me as the guy who makes websites not just work—but wow. Whether it's a sleek business site or a bustling online store, I ensure every pixel shines and every line of code sings.

Throughout my journey, I've mentored junior devs, juggled client calls like a pro, and handled solo projects like a one-man coding army. Every project? A masterpiece in the making.

When I'm not bending the web to my will, you'll find me nose-deep in a book, battling virtual foes in games, or marathoning movies and TV shows. I'm also fascinated by meditation, psychedelics, enlightenment, and the wild ride of evolution. Basically, I code by day, explore the universe by night.

EXPERIENCE

Sr. Software Engineer [Oct 2023 - Present]

Shaligram Infotech LLP - Full-time

- Led complex, high-level projects that **enhanced my problem-solving** and **technical skills**.
- Specialized** in **PHP**, **WordPress** and **WooCommerce** development, and crafted intricate **jQuery** modules.
- Began exploring the **React ecosystem** and deepened my **JavaScript** knowledge, discovering a new passion.
- Currently at Shaligram, continuously learning and refining my React skills, while planning my next tech milestone.

Software Engineer [Oct 2019 - Sep 2023]

KudosIntech Software Private Limited - Full-time

- Joined Kudos as a **fresh-faced Software Engineer** — with a **head full of dreams**.
- Completed **3 months of intensive training** in **PHP**, **HTML**, **CSS**, and **jQuery**, building a strong **web development foundation**.
- Confirmed** as a **full-time developer**, quickly transitioning into live projects and **tackling real-world challenges**.
- Learned about the **WordPress framework** and created **dynamic frontend solutions** with **jQuery**.
- Led **solo projects**, **mentored junior developers**, and handled **client communications** effectively.
- Specialized in **custom WordPress solutions**, **eCommerce stores**, **custom field blocks**, and **payment gateway integrations**.
